Proactive Web Developer at Sagenext Infotech, specializing in CodeIgniter-based development. Focused on building and managing the company's website and blog, gaining hands-on experience in full-cycle web development. Played a key role in creating dynamic and user-centric web solutions, which ignited a passion for furthering my career in development. Demonstrated strong problem-solving skills and a commitment to delivering high-quality, functional web applications.

Projects

Zoylee - Salon Appointment Booking App

Zoylee is an appointment booking app that's transforming the way we experience salon services. Whether you're looking for a traditional salon experience or the convenience of a home-based service, Zoylee has you covered. With a user-friendly interface, you can easily schedule appointments at your preferred salon or choose from a network of talented stylists who provide home-based services at competitive prices. Say goodbye to long waiting times and hello to personalized beauty and grooming experiences. Zoylee connects you with skilled professionals, ensuring you always look and feel your best.

Key Features:
- Scheduling system for multiple service types and locations
- Integrated network of professional stylists and salons
- Pricing comparison feature for competitive service rates
- Interface for both in-salon and home-based appointment options
- User rating and review functionality for quality assurance

Zoylee Artist - Partner App For Zoylee Artist

Zoylee Artist App aims to bring the service providers and customers under one umbrella by providing an intuitive, easy-to-use platform. When a customer requests for a home-based service, you get instant notification regarding their requirements and you can accept the booking on your terms. What's more, the app offers handy features for easy appointment management along with an in-built navigation feature to help you reach your destinations quickly and conveniently. Save time, energy and resources while setting yourself up for maximized earnings by becoming a Zoylee Artist.

Key Features:
- Implemented real-time notification system for customer requests
- Designed intuitive interface for booking acceptance and management
- Integrated appointment scheduling and navigation features
- Optimized for increased service provider earnings and efficiency
- Enhanced user experience for both customers and service professionals
- Streamlined home-based service delivery process

Zoylee Business - Partner App For Zoylee Vendor

Zoylee Business, a mobile app revolutionizing operations for spa, salon, and parlor owners. The app automates appointment booking and order tracking, increasing brand visibility and revenue opportunities at zero cost. Key features include a user-friendly scheduling interface, comprehensive appointment dashboard, in-app notifications, and customer management system with search functionality. The platform also offers CRM and inventory management tools, enhancing business efficiency and customer retention. Zoylee Business streamlines operations, improves customer experience, and enables hyperlocal search capabilities. This innovative solution empowers small business owners to focus on service delivery while leveraging technology to expand their customer base and optimize daily operations.

Key Features:
- Automated appointment booking and order tracking
- Implemented CRM and inventory management features
- Appointment scheduling interface
- Comprehensive dashboard for appointment overview
- Integrated in-app alerts and notifications system
- Customer search functionality by name and order ID
- Detailed customer information display

Zoylee Marketing - Tracking App For Zoylee Business Development Team

Zoylee Marketing Application for business development team, integrating Google Maps API for real-time tracking and monitoring. Implemented functionality to add salon vendors, including business information and service listings. This comprehensive solution streamlined team management, enhanced vendor onboarding processes, and improved overall business development efficiency. The application serves as a centralized platform for managing field operations and expanding Zoylee's salon network.

Key Features:
- Implemented Google Maps API for real-time team tracking and monitoring
- Functionality to add salon vendors with business information
- Feature to list salon services for each vendor

Get Delivered- Parcel Delivery Rider App

Get Delivered is a premier one-way parcel delivery service based in Delhi. The Get Delivered Rider App is designed specifically for the delivery partners, providing them with the tools they need to manage their tasks seamlessly.

Key Features:
- Order Management

- Task management features to streamline delivery operations
- Real-time tracking and route optimization functionality
- Parcel pickup and delivery processes

WishU - Personalized Video Wishing App

WishU is a video wishing application that allows users to add personalized messages and details to their videos. With various subscription options available for both personal and business use, WishU makes it easy to create and share heartfelt, customized video greetings.

Key Features:
- Features for adding custom messages and details to videos
- Subscription model with options for personal and business users
- User engagement through easy video creation and sharing capabilities
- Streamlined process for crafting and distributing customized video messages

Trenbee - E-commerce App

Trenbee is a Flutter-based e-commerce application that offers a comprehensive solution for online shopping. It includes modules for product listing, order processing, coupon management, payment completion, order tracking and other more features providing a seamless and efficient experience for users.

Key Features:
- Product catalog
- Order management
- Coupon management system,
- Payment processing
- Order tracking
- Real-time data synchronization and inventory management
- Collaborated with cross-functional team to deliver a feature-rich, scalable solution

EV91- Parcel Delivery Rider App

EV91 is a parcel delivery service with a dedicated app for delivery partners. This app streamlines delivery operations, making it easier for partners to handle their responsibilities and stay organized. The EV91 App equips them with essential tools to manage their tasks efficiently.

Key Features:
- Accept or reject orders
- Manage orders
- Real-time location tracking
- Update availability
- Attendance calendar
- Order history
- Earnings tracking

Trade on Wheel - Automotive Trading App

TradeOnWheel simplifies buying and selling cars with a user-friendly interface. It allows buyers to explore car models, view specs, features, and pricing, while sellers can easily list vehicles for a broad audience. TradeOnWheel streamlines the automotive trading experience, making it efficient and convenient for all users.

Key Features:
- Features for browsing car models, specifications, and pricing
- Integrated detailed vehicle information display
- Optimized user interface for seamless navigation and improved user experience
- Streamlined automotive trading process, enhancing efficiency for both buyers and sellers
- Expanded market reach for vehicle sellers through platform accessibility
- Enabled informed decision-making for buyers through detailed vehicle data
